

## THE ONLY SELF CLEANING, BUILT-TO-SURVIVE ADULT TURKEY DRINKER.

Finally, an alternative to bell drinkers that outperforms other watering systems in all critical areas. The Ziggity T-Max adult turkey drinker is an all-new drinker founded on proven concepts that made Ziggity number one in poul watering. Years of field research and fine-tuning has resulted in a drinker ideally suited to the adult turkey environment and the way male and female turkeys drink.

### Growing Big, Healthy Birds

Finishing turkeys requires birds to get ample hygienic water. Turkeys have poor eye-to-beak coordination, so we created a large target that turkeys can't miss. T-Max is designed to dispense fresh water with each drinking action, while minimizing spillage. Birds grow big. Litter stays drier, reducing ammonia release for healthier flocks.

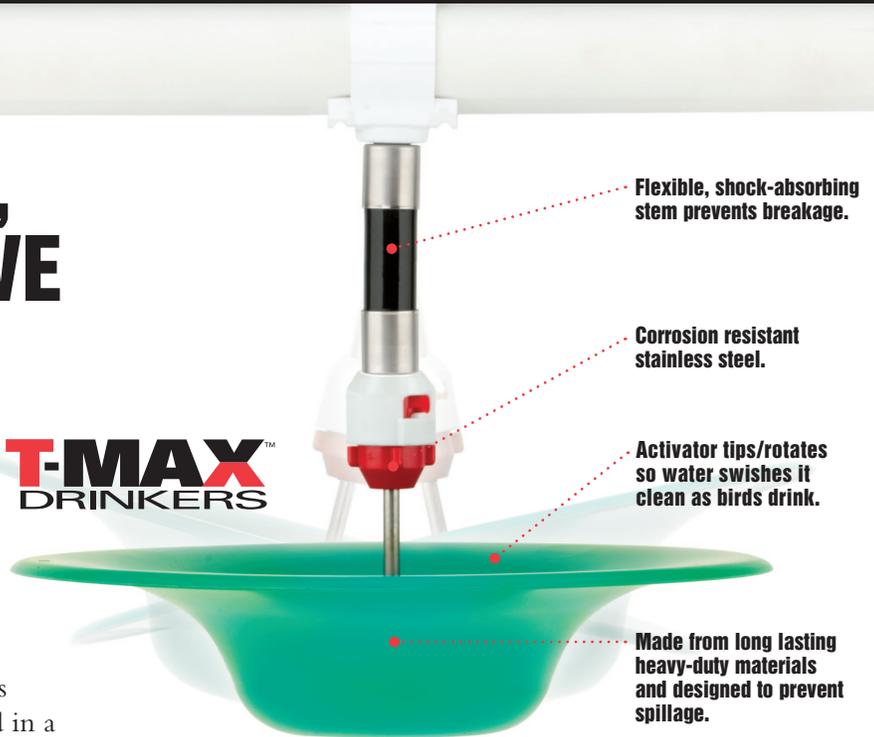

### Self-Cleaning Drinkers

T-Max tips and rotates while the turkey drinks. It is not a stationary cup as used on other systems. This action swishes water around, cleaning the drinker inside, eliminating many hours of scrubbing required for traditional bell drinkers. Plus, field tests show that litter tilling can be reduced or eliminated.

### Built-To-Survive

Turkeys have the ability to rapidly wear out watering systems. Ziggity's shock-absorbing flex-stem allows the entire drinker to "give," absorbing aggressive turkey behavior, eliminating breakage and potential leaks.

**T-MAX™**  
DRINKERS

Flexible, shock-absorbing stem prevents breakage.

Corrosion resistant stainless steel.

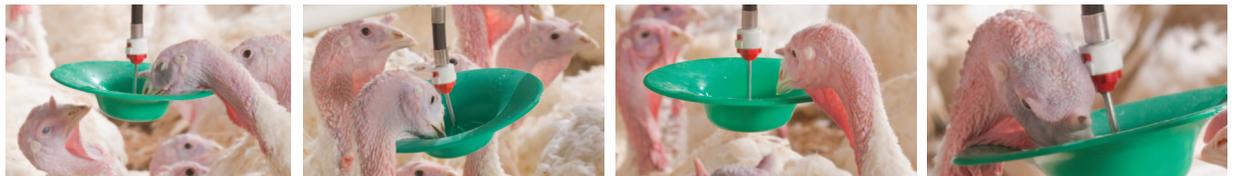

Activator tips/rotates so water swishes it clean as birds drink.

Made from long lasting heavy-duty materials and designed to prevent spillage.

**Number 1  
Poult Drinker**

Big, healthy turkeys. Self-cleaning. Built-to-survive. Everything you need in an adult turkey drinker. From Ziggity, the most trusted name in poultry watering. Visit [www.ziggity.com/turkey](http://www.ziggity.com/turkey) for a demonstration.

**From the leader in poult watering.**

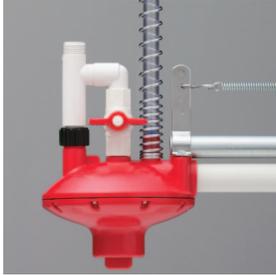

- Maximum weight performance
- Reduces litter moisture
- Reduced litter management
- Lower litter costs
- Reduced medication costs

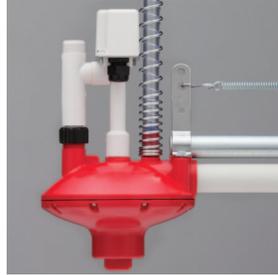

- Minimal ammonia release
- Improved feed efficiency
- Lower mortality
- Reduced undergrades
- No periodic cleaning

**FLOOR APPLICATIONS:**  
Adult Turkeys

# The same concept that made Ziggity the leader in poult watering, now reengineered for adult turkeys.

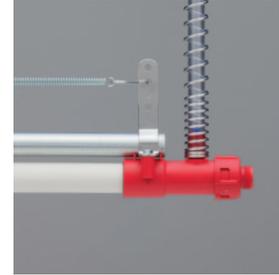

**Regulator.**  
Delivers high water volume at the low pressure required for no-spill drinking. Built-in flush valve makes for easy removal of sediment, biofilm and air.

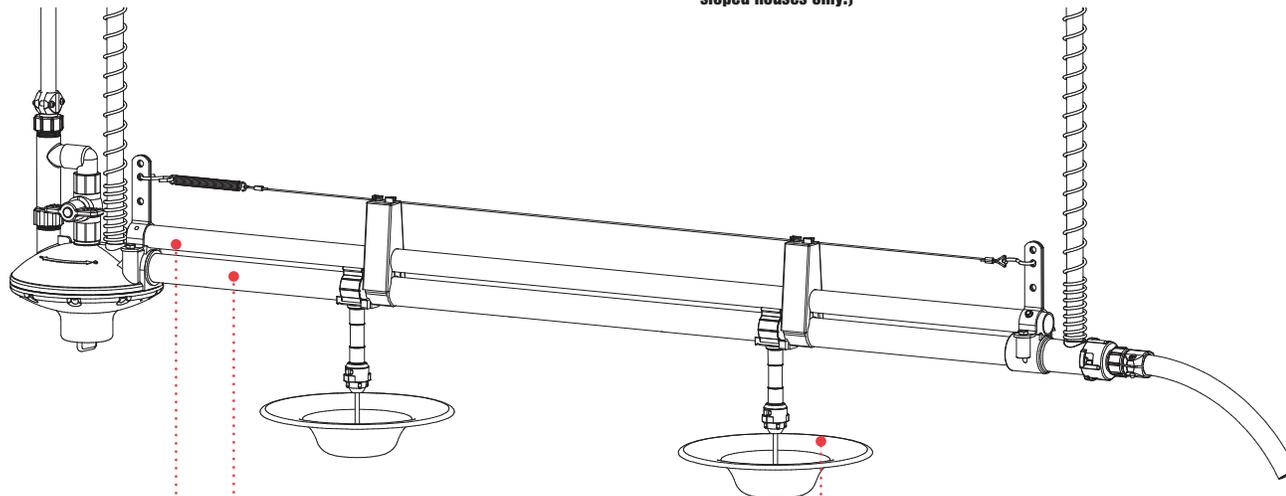

**Solenoid Regulator.**  
For automatic and unattended system flushing – requires connection to a controller or time clock.

**Slope Neutralizer.**  
Reduces slope pressure by a preset amount, requires no adjustment and maintains system pressure setting even when birds are not drinking. (Required in sloped houses only.)

**End Assembly.**  
Opens automatically during the flush mode for easy and effective flushing.

**Large Diameter Pipe.**  
Largest water bearing pipe ensures water supply even in the longest lines. Pipe interior has virtually no obstructions for more effective flushing.

**Galvanized Support Pipe.**  
Provides maximum support and minimizes system sway.

**Exclusive T-Max Adult Turkey Drinker.**  
A true breakthrough in system design is the flexible, shock-absorbing stem designed to help T-Max survive for the long haul.

At the center of each T-Max is a modified heavy-duty drinker with an extended trigger pin that holds the activator below. Ziggity's exclusive Twin Lock design keeps the drinker locked in the saddle. Turkeys also have a natural attraction to the green activator, giving rise to a fast learning curve.

## Ziggity Support.

As the only manufacturer 100 percent focused on poultry watering, Ziggity provides a number of special resources to optimize bird and system performance.

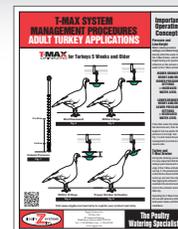

## Web Site.
